FLOOD HAZARD RISK REDUCTION & RESILIENCY GRANT PROGRAM

Flood Hazard Risk Reduction and Resiliency Grant Opportunity NJDEP Office of Flood Hazard Risk Reduction

Summary

- \$50 Million Program that provides funding for construction-ready flood control projects through a competitive grant process.
- Subsequent rounds may provide an additional \$150 million for a total of \$200 million.
- Matrix New World Engineering (Matrix) can leverage its extensive grant writing, flood hazard and resiliency project experience to prepare a highly competitive grant application for your municipality under this Program.
- Even if you do not have a shovel ready project at this time, Matrix is available to assist in the design of appropriate projects that will be highly competitive under this Grant Program.

Purpose The purpose of this competitive grant program is to fund projects that will reduce storm surge and flood hazard risks and enhance resiliency in the areas impacted by Superstorm Sandy.

Eligible Entities Open to municipal and county governments in Atlantic, Bergen, Cape May, Essex, Hudson, Middlesex, Monmouth, Ocean, or Union Counties. Regional coordination on projects is encouraged.

Award Amount Up to \$15 million per project. Limit 3 projects/applications per applicant.

Application Due Date December 15, 2014

Online Information/Application Portal:

www.nj.gov/dep/floodhazard/grants.htm

Project Types:

- Coastal Lakes Surge Reduction & Increased Discharge Capacity;
- Flood Risk Reduction Infrastructure, Including Certain Facilities Hardening Projects;
- Stormwater Management; or
- Beneficial Use of Dredge Material.
