INDUSTRIAL WASTEWATER SERVICES

Matrix Handles Industrial Wastewater

Our wastewater professionals can help you analyze and plan integrated conventional or innovative systems that meet your operational requirements. Based upon your specific wastewater systems management needs, Matrix's professionals can design and construct solutions to support each phase – planning, design, permitting, construction and system start up and training.

Matrix professionals have completed many wastewater projects nationwide. With Matrix, you will have a depth of resources including engineers, scientists, technicians and construction professionals who can provide a wide range of services, from small pH neutralization systems to large biological wastewater treatment design build projects.

If you are seeking support to address collection, pumping, treatment or discharge of wastewater, including the reuse/disposal of sludge, Matrix's professionals have the experience to provide cost-effective solutions.

Services provided

- Wastewater System Evaluation
- Design Services
- Optimization Studies
- Troubleshooting
- Construction
- Construction Management
- Conveyance Line Evaluation & Replacement
- Project Management
- Startup Services
- Technology Evaluation, Design & Installation
- Best Practice Assessment
- Alternative Disposal Options for High Strength Wastewater
- Zero Liquid Discharge
- Laboratory Sampling & Analyses
- Bench & Pilot Studies
