Matrix New World Engineering, Inc. Expands National Reach

Matrix New World Engineering, Inc., announced the opening of its latest office located in Mobile, Alabama.

East Hanover, NJ - May 10, 2011

According to Dennis Petrocelli, PG, Senior Vice President, "This expansion into Mobile, Alabama, along with our office in Goodyear, Arizona and our corporate headquarters in East Hanover, New Jersey, enables Matrix to meet the diverse needs of a large region of the United States."

Matrix New World Engineering, Inc. (Matrix) is the largest and most respected woman-owned full-service engineering firm in the northeast. Last May, Matrix responded to the Gulf of Mexico as part of The Alliance to provide boom deployment strategy, permitting, wildlife capture operations, natural resource compliance, and waste auditing in response to what has become the largest oil spill in history. The Alliance is a spill response and natural resources damage (NRD) joint practice with the firms O'Brien & Gere and Versar.

The firm also had staff involved in claims settlement and lease negotiation in support of the response effort in Louisiana. Matrix still has staff currently deployed in Louisiana, Mississippi, Alabama, and Florida performing various tasks. The firm plans on continuing to grow their business in the Gulf region.

Matrix has a strong reputation for providing environmental and engineering services in the northeast, participating in major transportation and infrastructure projects including the Access to the Region's Core and Trans-Hudson Express (THE) Tunnel project, MTA's East Side Access and Second Avenue Subway projects, NJ Transit Hudson Bergen Light Rail, the Grand Central Terminal Rehabilitation, the Port Authority of New York and New Jersey's North Avenue Corridor, and New York City Department of Design and Construction and New York City Transit on-call contracts.

Matrix was formed in 1990 as a primarily environmental consulting firm serving a small base of clients. Today, Matrix provides environmental, geotechnical, and civil engineering, oil spill and survey services. For more information on Matrix, please contact Dennis Petrocelli, PG, Senior Vice-President, 973.240.1800 or [Email](#)
